

Research Starters • Databases

Research starters are short summaries and authoritative overviews of popular research and discipline-specific topics. Information provided in a research starter may be an entry from an encyclopedia, credible resources curated by database editors, and reference databases. They are a starting point for more in-depth research on a topic and often help students determine if the topic selected is appropriate (Course Library Guide).

Select a Research Starter

Choose one of the research starter databases discussed in class. Circle the database you selected.

Working with an Issue or Topic

Explore a topic or issue of your choice and select an item to review. It can be an article, newspaper entry, website, video, or research starter overview.

Enter the topic explored in the search box below:

Use the database citation generator and provide an MLA citation of your item below:

Would you use the information presented for a research project? Why or why not?

Name: _____
