

Identifying Keywords

This activity offers opportunity to identify keywords to use with research question. Students will provide their research question and identify potential keywords for questions submitted by classmates/group members.

Directions: Student Research Question

Write your research question/topic in the search box below. Not enough room? Use the space directly below.

Q

Activity: Brainstorming Keywords

After identifying your question, pass your sheet the person sitting to your right. They will have 60-90 seconds to supply keyword suggestions related to your topic. When time is up, pass the paper again. This will continue until everyone in the group has provided a selection of keyword options for the research question.

Review suggestions provided by your peers and select a series of keywords to use for your initial database search.
